IoT is easier for end users, easier for partners and, of course, easier for business growth with Ingram Micro. Throughout the technology value chain, Lenovo brings edge compute to your IoT initiatives, allowing artificial intelligence and machine learning to come to life for your customers. What data are your customers missing to be more successful? Together, we can help them find, analyze and use it to not just grow, but grow faster.

**What do IoT solutions provide?**

- Reduced risks
- Reduced costs
- Business insights
- Process automations
- Greater efficiencies
- Improved quality of life
